

Automated data capturing

Automated Data Capturing entails:

Automated Invoice and Data Capturing, including various source documents. Efficiencies in accounting processes

Our Approach is diagrammatically indicated as follows:

SOURCE DOCUMENTS

Upload and transfer various sources of supporting documents for automated capturing and checking

ACCOUNT ALLOCATION

Efficiencies in account checking, allocation and reconciliations

Source document collation and transmittal is a key aspect of this process. This can be on premise or done remotely. Please do contact us to unpack the approach and for us to align it to your requirements.

Our Deliverable to you is typically:

- Updated accounting entries
- Supporting schedules

What we generally need from you is:

- Receipt of invoice records and other source documents
- Frequency of information uploads
